Trendy coffee drinks for Gen Z

WMF 2-Milk Solution now available for WMF 1500 S+ - the first choice for medium coffee requirements

Top-quality vegan coffee specialties at the touch of a button – WMF Professional Coffee Machines is extending its successful 2-Milk Solution to meet the needs of customers with medium coffee demand. Now available for the WMF 1500 S+ specialty coffee machine, the 2-Milk Solution enables even smaller cafés, bakeries, and businesses to also offer premium plant-based beverages – crafted from oat, soy, almond, pea milk and more – to delight today’s discerning Gen Z consumers. Despite its compact size, the WMF 1500 S+ is designed for creativity and performance. With a recommended daily capacity of 180 cups and three product hoppers for various coffee beans, powders, or toppings, there’s virtually no limit to the variety of coffee creations business owners can offer.

WMF’s state-of-the-art milk systems deliver outstanding results with every cup. The “Dynamic Milk” system in the WMF 1500 S+ fully automatic machine can produce four different textures of hot milk foam and three textures of cold milk foam – perfect for trendy, Instagram-worthy coffee beverages. The addition of the 2-Milk Solution further enhances WMF’s milk expertise, offering even greater flexibility in recipe creation.

With this combination, the WMF 1500 S+ and the 2-Milk Solution empower medium-sized coffee businesses to keep up with the rising demand for high-quality vegan options. Plant-based milk alternatives made from oats, soy, almonds or peas can be processed just as efficiently as traditional dairy milk, allowing businesses to meet evolving preferences without sacrificing profitability. Recipes using these alternatives can be easily stored in the machine’s memory and selected at the touch of a button during everyday service.

Smart features for everyday efficiency

The WMF 1500 S+ is packed with premium features designed for seamless operation and consistent quality. Its small footprint (just 32.5 x 59 cm) belies its robust performance, delivering up to 180 cups per day. The 10-inch touch display and automatic cup height detection ensure intuitive operation, while the ‘Dynamic Coffee Assist’ system maintains optimal quality for all espresso-based drinks.

Press release

Another standout feature is the WMF AutoClean system. As the first fully automatic cleaning solution in the industry, it hygienically cleans both the coffee and milk systems according to HACCP standards – entirely without manual intervention. Time-consuming and error-prone cleaning processes are a thing of the past. With the built-in timer, operators can easily schedule cleaning cycles, and the machine handles the rest on its own.

About WMF

For over 170 years, WMF has been dedicated to achieving the perfect balance of design, functionality and quality. In its field, WMF Professional Coffee Machines is one of the world's leading suppliers, and it aims to be first choice worldwide for professional coffee solutions. The "Made in Germany" quality seal guarantees premium products and innovative strength combined with the highest performance and reliability. As a result, WMF Professional Coffee Machines offers just the right concept for every business model in the coffee sector – from high-performance fully automatic machines for coffee specialities and filter machines right through to semi-automatic portafilters and innovative digitalisation concepts. Moreover, national and international customers alike benefit from high-quality consulting and service, based on the largest in-house service organisation for professional coffee machines in Europe. In 2016, the WMF brand became part of the French Groupe SEB.
