

## PRESS RELEASE

## **Milk System Best Foam for Schaerer Coffee Skye**

### **Compact machine concept brings premium coffee enjoyment to every niche**

Zuchwil, 15 October 2025 – With an output of up to 180 cups per day, a compact footprint and a smart price structure, the Schaerer Coffee Skye is the first choice for locations with medium coffee demand. At the same time, a wide range of configuration options and sophisticated technology ensure it meets the highest expectations for a varied coffee menu in outstanding quality. To offer customers even greater flexibility in tailoring the Schaerer Coffee Skye to their individual needs, the machine concept will receive an optional upgrade in October: the Best Foam milk system. Previously available only for the Schaerer Coffee Soul, Schaerer's patented Best Foam will now also deliver barista-level milk foam on the Schaerer Coffee Skye. And thanks to the compact design, this is possible in even the smallest niche. In combination with the Schaerer Twin Milk system, there are virtually no limits when creating premium coffee specialities based on fresh milk or plant-based drinks. Since July a bean container extension for storing up to 1500 g of coffee, as well as an easy-to-retrofit rear cover for an optimised appearance of the Schaerer Coffee Skye, are available.

#### **Schaerer Best Foam for barista-level milk foam**

In addition to the Pure Foam milk system, Schaerer will also offer the patented Best Foam milk system for the Schaerer Coffee Skye as an option from October (mains water connection required). This provides even more options for setting milk temperature (from cold to hot) and foam texture (from very liquid to firm). Thanks to steam heating and the patented mixer, the result is barista level: the foam is wonderfully creamy, silky-glossy and at the same time stable, so cappuccinos and the like can be served to perfection in both look and taste. If customers choose to equip the Schaerer Coffee Skye with the Twin Milk system, Best Foam also creates vegan foam in exceptionally high quality.

#### **Compact design, ideal for every niche**

As the ideal all-rounder, the Schaerer Coffee Skye brings premium coffee enjoyment wherever it is desired – whether in small cafés, hotels or for mobile use. Its capacity of up to 180 cups per day makes it particularly attractive for lower-traffic locations with high expectations for beverage quality and variety. Thanks to its small dimensions and integrated 4.9-litre water tank, the Schaerer Coffee Skye can be installed anywhere with a power connection. A variant with mains water connection is also available as an option. Additional flexibility comes from the ability to place add-on units to the right, left or even under the counter. If the machine is positioned freestanding, the optionally available rear cover ensures a more harmonious look.

**Straightforward installation, easy maintenance**

Particularly beneficial in tight spaces is direct access to all connections required for installation (main power, add-on units, mains water connection, waste water drain) from the front. The side openings also make it easier to connect the milk cooling units. The bean containers are easy to access and can be removed individually for quick cleaning. Locations with high coffee consumption can also opt for the container extension, increasing capacity from 750 g to 1500 g of beans. The extension is simply fitted onto the existing containers. A further plus in day-to-day service is the function lighting on both sides of the central beverage outlet. It indicates the machine's current status in white (ready for operation), yellow (action required soon) and red (action required now). This allows service staff to see from a distance whether action is needed. This all-round convenience, combined with advanced technology, makes the Schaerer Coffee Skye the ideal partner for anyone wishing to offer premium coffee in smaller or changing locations.

**About Schaerer**

Founded in 1892 and headquartered in Zuchwil, Switzerland, Schaerer Ltd. is one of the world's leading manufacturers of fully automated professional coffee machines. As a well-established brand with a long history, Schaerer stands for Swiss values combined with in-depth knowledge on coffee. The brand emphasizes these attributes in its claim "swiss coffee competence" and lives them equally in its product development and the Coffee Competence Centre, Schaerer's coffee competence and training centre in Zuchwil. Moreover, Schaerer is characterised by extreme flexibility adhering to the guiding principle of "We love it your way" - whether it concerns customer requests, customer-specific products bulk orders or the product range which offers the customer a wide collection of customised configuration options. Customer-oriented and equipped with comprehensive knowledge on coffee, Schaerer supports any customer of any size all over the world in offering guests delicious coffee of the highest quality. Schaerer has been part of the French consortium Groupe SEB since 2016.
